

HOW TO DETERMINE YOUR RING SIZE

- Print this page at 100% to ensure accuracy
- For sizing reference, measure the bar below when page is printed.
The bar must measure 30 mm exactly.
(If the bar is not accurate your ring size measurement will be incorrect).
- Select a ring that properly fits your intended finger
Note: It is best to measure your finger at the end of the day and when your fingers are warm (fingers are smaller in the early morning or when they are cold).
- Place your ring over the top of the circles above. When the inner edge of the ring and the outer layer of the circle match, you have found your ring size.
- If the ring falls between two sizes, order the larger size.
